Career Objective

Full Stack Developer with expertise in React.js and Node.js, seeking a challenging role to apply my skills.

Experience

Applore Technologies

08 May 2024 – 08 Nov 2024

Mern Stack - Intern

Noida, Uttar Pradesh

- Designed landing pages for tour booking and CD app using React and Next.js, enhancing user experience with interactive components. Demo: Tour Booking CD App
- Resolved frontend issues on Pet Republic and Pondree eCommerce admin dashboards, including date validation, image selection errors, pagination, and sorting functionality. Enhanced responsiveness and integrated TinyMCE editor for an improved UI experience
- Collaborated with team members using Git for version control to organize modifications and design tasks

Can Technologies

01 January 2024 – 05 April 2024

Front End Developer Intern

Noida, Uttar Pradesh

- Worked on an admin dashboard for a finance project using ReactJS
- Designed components for login, signup, API integration, and JSON data display in a table UI

Share India Securities Ltd

July 2022 – Feb 2023

Software Engineer

Noida, Uttar Pradesh

- Developed a C++ intraday trading strategy on Linux for real-time data processing and trade execution
- Integrated an automated stop-loss feature for risk management

Projects

QEats-Food Ordering Web App | *React.js, Express.js, Node.js, MongoDB, CSS* | Live Demo | Admin Panel

- A Swiggy-like food delivery app with real-time API integration, responsive design, and lazy loading for enhanced performance, and state management using Context API.
- Created add-to-cart, order placement, secure Stripe payments, and real-time order tracking with admin updates
- Built an admin panel for product and order management, ensuring a responsive design and scalable architecture
- Implemented secure user authentication and account creation features

Algorithm Visualizer | *DSA, React.js, CSS* | Live Demo

- Developed an interactive Algorithm Visualizer app with real-time animated visualizations of sorting algorithms like Bubble Sort, Insertion Sort, and Selection Sort
- The app used instant notifications upon completion and displayed time and space complexity, enhancing user engagement
