EXPERIENCE

Software Developer

Jan 2025 - Present

Vserv Infosystems Private Limited

Noida, India

- Designed service level agreement module using React.js, Node.js, MySQL, and REST APIs.
- Added SLA features including policy, SLA response and resolution time, business hours, holiday calendar, and escalation.
- Created dashboards for SLA monitoring, ticket status tracking, and reporting.
- Fixed bugs, optimized existing features, and improved application performance and user experience.
- Developed 4 ERP modules for Item Management, Inventory Management, Price List Management, and Mobile App Management.
- Implemented first-level approval notifications and developed role-based dashboards for Vendor, Purchaser, Finance.
- Added reporting and export features with PDF generation, Excel import/export, and print support.

MERN Stack - Intern

May. 2024 - Nov 2024

Applere Technologies

Noida, India

- Worked on frontend features and REST API integration for Pondree and Pet Republic admin dashboards, resolving 30+ UI issues.

Frontend Developer Intern

Jan 2024 - Apr 2024

Can Technologies

Noida, India

- Developed 2+ frontend modules for a finance dashboard using ReactJS with REST API integration.

Software Engineer

Jul 2022 - Apr 2023

Share India Securities Ltd

Noida, India

- Built frontend modules for live market data, stock search, buy and sell, order book, trade book, and portfolio.

PROJECTS

Asset Management System | *Next.js, TypeScript, Node.js, Mongoose, Tailwind CSS, Demo* Mar 2026 - Present

- Implemented login and user management with JWT authentication, refresh tokens, bcrypt password hashing, OTP password reset, first-time setup, roles, permissions, and user assignments.
- Built modules for departments, sub-departments, locations, sub-locations, vendors, asset categories, sub-categories, types and support groups with manager, member, and ticket limit management.
- Developed asset creation with asset details, purchase information, IP address, MAC address, QR code, Excel import/export, asset allocation, returns, history, and overdue.
- Built gate pass management for asset requests, return, technician and end-user portals, dashboards, reports, audit logs, and report export.

Travel Desk Management System | *React.js, Node.js, Express.js, MongoDB, Demo*

May 2025 - Jul 2026

- Built travel requests with multi-traveler support, applied request tracking, and live status updates.
- Developed manager and HR approval, email notifications, and vendor assignment.
- Developed vendor booking with ticket and bill upload, booking confirmation, and finance payment tracking.
- Built admin overview, user management, search, filters, pagination, Excel export, and dashboards.
